

## Special Issue

# Recent Advances in the Management of Gastrointestinal Disorders

### Message from the Guest Editor

In recent years, great advances have been made in the field of gastroenterology. The day-to-day management of gastrointestinal disorders has significantly altered in the last decade and has affected how we undertake gastroenterological treatment, including hepatitis C treatment, spyglass, radiofrequency ablation, Hemospray, etc. However, traditional techniques for the management of such diseases are still applied today. The aim of this Special Issue is to review recent advances in the management of gastrointestinal disorders and, simultaneously, emphasize the standard of care for such disorders. We welcome the submission of both review articles and recent research studies.

### Guest Editor

Dr. Micheal Tadros

Department of Medicine, Division of Gastroenterology/Hepatology,  
Albany Medical College, Albany, NY 12208, USA

### Deadline for manuscript submissions

closed (30 June 2024)
