Novelties in Diagnostics and Therapeutics in Hepatology

Message from the Guest Editors

Liver diseases are a globally recognized cause of morbidity and mortality. The burden of these diseases has rapidly changed over the last decade due to the introduction in clinical practice of new antiviral agents for hepatitis C virus. Therefore, hepatologists' are now facing the burden of other pathological entities, such as metabolic-associated and hematological-associated liver diseases. A multidimensional diagnostic work-up is needed to ensure optimal management of these patients. Furthermore, novel techniques and drugs are under investigation for the treatment of advanced stages of liver disease which are complicated by portal hypertension and hepatocellular carcinoma. Within this Special Issue, we will summarize the most updated and cutting-edge research on these fields.

About the Journal

Message from the Editor-in-Chief

Gastroenterology Insights is an international open access journal on all aspects of gastroenterology and hepatology, indexed by ESCI (Web of Science) and Scopus in the field of gastroenterology and hepatology, for the publication of clinical research on the alimentary tract, liver, biliary tree, and pancreas. Regular publications include articles describing new disease mechanisms and new management strategies, both diagnostic and therapeutic, that may impact clinical practices in the near future. Manuscripts are peer-reviewed and a first decision is given to the authors in less than 3 weeks after submission.

Editor-in-Chief

Dr. Atsushi Sakuraba

Division of Digestive Diseases and Nutrition, RUSH University Medical Center, Chicago, IL, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 7.7 days (median values for papers published in this journal in the first half of 2026).
