

Special Issue

Current Developments in Esophageal Pathology

Message from the Guest Editor

Pathology provides an essential contribution to the management of esophageal diseases. New developments in the clinical management of esophageal disorders influence daily pathology diagnostics, and novel molecular findings are pushing forward research projects. This Special Issue will cover current developments in pathological aspects of neoplastic and non-neoplastic diseases of the esophagus and the gastroesophageal junction. It will comprise all kinds of pathology-related topics ranging from inflammatory changes to cancer. Contributions regarding histology, cytology, and molecular pathology, covering all fields from basic research to clinical diagnostics, are welcomed.

Guest Editor

Dr. Rupert Langer

Institute of Pathology, University of Bern, 3012 Bern, Switzerland
