Deadline for manuscript submissions:
closed (31 May 2024)

Message from the Guest Editor

Dear Colleagues,

The aim of this Special Issue is to elucidate, either computationally by molecular dynamic or mesoscale simulation as well as experimentally, the role of these interactions in the observed macroscale properties at different scales. The scope of this Issue includes peptides, proteins, carbohydrates, nucleic acids, proteoglycans, glycoproteins, and proteolipids. Furthermore, discussions should incorporate the measurement and quantification of these interactions and the rules governing their self-assembly and structure formation at different length scales. The properties which should be considered include, among others, degradability, mechanics, rheology, micellization, gelation, surface adsorption, bioadhesion, ligand–receptor interaction, and immune reaction.

Message from the Editor-in-Chief

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q2 (Polymers and Plastics)
