

IMPACT FACTOR 5.3

an Open Access Journal by MDPI

# **Nanoparticle-Hydrogel Composites for Biomedical Applications**

Guest Editors:

### Prof. Dr. Rolando Barbucci

Centro Interuniversitario Sistemi Medici Avanzati (CRISMA), 53034 Colle di Val d'Elsa, Siena, Italy

#### Dr. Andrea Atrei

Dipartimento di Biotecnologie, Chimica e Farmacia, Università di Siena, Via A. Moro 2, 53100 Siena, Italy

#### Dr. Marianna Uva

Interuniversity Research Centre for Advanced Medical Systems (CRISMA), Viale Matteotti 15, 53034 Colle di Val d'Elsa, Siena, Italy

Deadline for manuscript submissions:

closed (30 November 2015)

## **Message from the Guest Editors**

Dear Colleagues,

Embedding inorganic, organic or biological nanoparticles in hydrogels allows one to prepare hybrid materials capable of responding to a variety of stimuli from the surrounding environment. Nanoparticles can be simply entrapped in hydrogels, prepared inside the hydrogels or functionalized to work as a crosslinker of polymer chains. Incorporation of nanoparticles into hydrogels modifies the swelling degree and the physicochemical and mechanical properties of the polymer network. In the case of magnetic nanoparticles, the application of static/alternating magnetic fields offers the possibility of addressing and remotely modulating drug release from hydrogels.

### **Message from the Editor-in-Chief**

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (Organic Chemistry)
