

Special Issue

Development and Applications of Advanced Geopolymer Gel Materials

Message from the Guest Editors

This Special Issue aims to disseminate knowledge on advanced geopolymer gel materials (AGGMs) and discuss their classification for application in various infrastructure fields. This Special Issue aims to disseminate knowledge on AGGMs and discuss their classification for application in various infrastructure fields. This Special Issue also aims to raise awareness of the harmful impact of industrial waste on human health and safety. This issue aims to provide an overview of recent advances in the contribution of nanomaterials and related technologies to sustainable development and future prospects in this field. We invite authors to submit experimental and theoretical original articles, perspectives, and review articles addressing these problems and similar topics.

About the Journal

Message from the Editor-in-Chief

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

Editor-in-Chief

Prof. Dr. Esmail Jabbari

Biomimetic Materials and Tissue Engineering Laboratory, Department of Chemical Engineering, University of South Carolina, Columbia, SC 29208, USA

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
