

Special Issue

Nanocomposite Hydrogels and Their Applications in Targeted Drug Delivery

Message from the Guest Editors

Nanocomposite hydrogels were developed using natural and synthetic polymers with enhanced mechanical and responsiveness properties, resulting in an enormous potential and advances for several biomedical applications. This Special Issue on “Nanocomposite Hydrogels and their Applications in Targeted Drug Delivery” focuses on original research papers and comprehensive reviews. This Special Issue aims to illustrate the recent development and future perspectives of nanocomposite hydrogels in targeted drug delivery; however, this is not limited to biomaterials, design and synthesis methods of nanocomposite hydrogels and nanocomposite smart hydrogels, characterization of hydrogels, crosslinking strategies, and biomedical applications.

About the Journal

Message from the Editor-in-Chief

Gels (ISSN 2310-2861) is recently established international, open access journal on physical and chemical gel-based materials. The journal aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. General topics include but not limited to synthesis, characterization and applications of new organogels, hydrogels and ionic gels made either from low molecular weight compounds or polymers, composite and hybrid materials where a metal is by some means incorporated into the gel network, and computational studies of these materials in order to provide a better understanding of gelation mechanism. We cordially invite you to consider publishing with us and contribute with your own grain of sand to the advance in this fascinating field.

Editor-in-Chief

Prof. Dr. Esmail Jabbari

Biomimetic Materials and Tissue Engineering Laboratory, Department of Chemical Engineering, University of South Carolina, Columbia, SC 29208, USA

Author Benefits

High visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q2 (Polymers and Plastics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 10.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
