Family Identities: How Genetics Is Contributing to Genealogical (Re)search

Message from the Guest Editor

We invite researchers to reflect on what "family identity" could mean according to each society and/or time period; how this concept can model each person's identity; if a genetic result can affect the personal identity of an adopted individual; or what could be the real value of a surname in the study of family lines. On the other hand, examining the usefulness of a genetic study in the reconstruction of identity, not only of the family but also of society, in cases of civil wars, terrorism, war conflicts, and the disappearance of civilians during both civil and military dictatorships. Furthermore, the genetic perspective is also considered very interesting in the study of ancient populations, relating them to each other, as well as comparing them with the modern gene pool, being able not only to describe possible population movements in "family groups", but also detect patterns of "identity" within and between communities. Finally, reflection is also important on the fundamental role that genetic analysis is playing in so-called "cold cases", namely in the field of forensic genealogy, and the possible legal issues associated with genetic study in genealogical research.

About the Journal

Message from the Editorial Board

Genealogy is a scholarly journal that provides a venue for academic, cutting-edge contributions to the interdisciplinary field of genealogy studies. We welcome contributions that examine genealogies of family lineage, use genealogical considerations and methods in examining other historical processes (including migration histories, personal, social, and national identities, and social institutions) or study the construction of genealogical narratives. The journal is also interested in biographical studies and their contribution to the understanding of broader social and historical phenomena.

Editors-in-Chief

Dr. Athena Leoussi

Department of Languages and Cultures, University of Reading, Reading
RG6 6EE, UK

Prof. Dr. Natividad Gutiérrez Chong

Institute of Social Research, National Autonomous University of Mexico,
Mexico City 04510, Mexico

Prof. Dr. Joanna Beata Michlic

UCL Institute for Advanced Studies, Centre for Collective Violence,
Holocaust and Genocide Studies, University College London, London

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), and many other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.3 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
