Pharmacogenetics of Psychiatric Diseases

Guest Editor:

Dr. Antonio Drago

Unit for Psychiatric Research,
Psychiatry, Aalborg University
Hospital, DK-9100 Aalborg,
Denmark

Deadline for manuscript
submissions:

closed (20 October 2024)

Message from the Guest Editor

Dear Colleagues,

Original research, reviews, and creative means of covering a variety of pharmacogenetics-related subjects in psychiatry are welcome in this Special Issue. The use of pharmacogenetics in clinical practice, the development of legislative tools and infrastructure related to pharmacogenetics, the search for novel pharmacogenetic markers specific to psychiatric treatments, the importance of epigenetics and rare genetic variants in pharmacogenetics, and innovative protocols for pharmacogenetic research are just a few of the subjects welcome.

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
