Message from the Guest Editors

I hope this Special Issue can share the latest research on the genetic, immunogenicity and pathogenicity differences of the street rabies virus (RABV) isolated from different times, regions and breeds of animals. Studies are welcome that cover topics including RABV gene and structural protein function, non-coding gene regulation of rabies virus replication, interaction of the rabies virus and host protein, the mechanism of rabies virus escaping from host immunity, the mechanism of the rabies virus inhibiting host endogenous immunity, and new rabies vaccines.

Deadline for manuscript
submissions:

20 June 2024

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
