Message from the Guest Editor

Forensic Genetics has—mainly due to the advent of modern DNA technologies—undergone an impressive development leading to exciting possibilities in forensic genetic work with criminal cases, relationship testing, identification of human remains, animal and plant forensics, etc. This Special Issue is dedicated to the presentation of the current status of forensic genetics and discussion of future challenges and goals through invited presentations. Colleagues are encouraged to submit manuscripts with original research in forensic genetics.

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
