## New Advances in Immunogenetics of Disease

Guest Editors:

**Prof. Dr. Elżbieta Kaczmarek**

Department of Bioinformatics and Computational Biology, Poznan University of Medical Sciences, Rokietnicka 4 Street, 60-806 Poznań, Poland

**Dr. Bogna Grygiel-Gorniak**

Department of Rheumatology, Rehabilitation and Internal Medicine, Poznan University of Medical Sciences, 28 Czerwca Street 135/147, 61-545 Poznań, Poland

Deadline for manuscript submissions:

**closed (15 September 2024)**

### Message from the Guest Editors

Immunogenetic studies and the identification of genetic variations significantly impact new therapeutic targets for diseases. Advances in sequencing technologies have led to opportunities to systematically analyze omics data for the better diagnosis and treatment of diseases.

This Special Issue aims to collect high-quality original research articles, mini-reviews, and full length-reviews on the following issues:

Immunogenetic basis of disease pathogenesis;

Quantitative immunogenetics;

Prognostic indicators of immunogenetics in diagnosis, therapies, and insight into the pathogenesis of diseases;

Associations between aging, unhealthy lifestyle, poor diet, and immunogenetic background of chronic diseases;

Bioinformatics strategies and opportunities for searching appropriate reference sequences and sequencing-based genotyping;

Bioinformatic approaches and technologies used to achieve the proper level of typing resolution in immunogenicity.

## Editor-in-Chief

**Prof. Dr. Selvarangan  
Ponnazhagan**

Experimental Cancer  
Therapeutics, The University of  
Alabama at Birmingham, 1825  
University Blvd., SHEL 814,  
Birmingham, AL 35294-2182, USA

## Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
