Deadline for manuscript
submissions:

closed (31 May 2018)

Message from the Guest Editors

Dear Colleagues,

Synthetic biology is a rapidly moving field that combines molecular biology approaches with engineering concepts, which has a very large potential impact across all human endeavors. While topics, such as the production of biofuels and industrial chemicals in microorganisms, and gene editing with CRISPR-Cas9, have been the subject of many reviews, we feel that synthetic biology has a much broader array of applications, some of which we would like to highlight in this Special Issue.

Special Issue

genes

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan

Department of Pathology, The University of Alabama at Birmingham, 1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics and Heredity*) / CiteScore - Q2 (*Genetics (clinical)*)
