Genetics of Hearing Impairment

Guest Editors:

Dr. Ignacio del Castillo

1. Servicio de Genética, Hospital
Universitario Ramón y Cajal,
IRYCIS, Madrid, Spain
2. Centro de Investigación
Biomédica en Red de
Enfermedades Raras (CIBERER),
Madrid, Spain

Prof. Dr. Hannie Kremer

Department of
Otorhinolaryngology and
Department of Human Genetics,
Radboud University Medical
Center, Nijmegen, The
Netherlands

Deadline for manuscript
submissions:

closed (1 November 2020)

Message from the Guest Editors

Dear Colleagues,

The inner ear is a complex machinery at the cellular and molecular levels. Many different genes and proteins play roles in the development and maintenance of its structure and function through participating in diverse molecular networks. Consequently, hearing impairment encompasses a wide variety of disorders that are clinically and genetically heterogeneous. Understanding their genetic causes and their pathophysiological mechanisms, and characterizing the resulting phenotypes, are essential for developing novel therapies that target the specific defects. Application of the most recent omics technologies and genome editing methods is boosting the research in this field. This Special Issue in *Genes* entitled “Genetics of Hearing Impairment” will address the genes and mutations involved in hearing impairment, the mechanisms through which mutations result in the different syndromic or non-syndromic disorders, the description of the associated phenotypes in humans and in animal models, and the development of specific gene therapies.

Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
