Gene Regulation of Development and Reproduction in Mammals

Guest Editor:

Prof. Dr. Chunjin Li

College of Animal Sciences, Jilin University, Changchun 130062, China

Deadline for manuscript submissions:

closed (20 October 2023)

Message from the Guest Editor

The formation of the sperm and egg, the union of these at fertilization, and the development of the new organism through pregnancy are amongst the most fascinating processes in biology. To further understand the molecular mechanisms regulating the developmental and reproductive processes in mammals is essential to improve reproductive management strategies and treatments for disruptions in reproductive function. A variety of candidate genes, and regulatory networks identified by genomics technologies have provided us the opportunity to unlock this biological conundrum.

In this Special Issue, we are inviting submissions of original research articles, review articles, and communications related to various aspects of Gene Regulation of Development and Reproduction in Mammals.

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
