# **Advances in Bioinformatics and Environmental Health**

Guest Editors:

**Message from the Guest Editors** 

Dr. Huang Lin

Dr. Zhen Chen

Dr. Ruijin Lu

Deadline for manuscript submissions:

25 July 2024

In today's world, where environmental factors intricately influence health, bioinformatics emerges as a key player in deciphering these complex relationships. Our Special Issue, titled "Advances in Bioinformatics and Environmental Health", is dedicated to exploring the dynamic interplay between environmental exposures, various biomarkers, and health outcomes.

Our focus extends to research developing and applying bioinformatics tools for biomarker identification and analysis, including, but not limited to, genetics, epigenetics, genomics, metagenomics, and metabolomics, as well as their connections to environmental stressors such as pollutants, chemical mixtures, extreme weather events, and their consequent health effects.

We encourage submissions from experts in the field, including research articles and critical reviews, to foster advancement in the realms of bioinformatics and environmental health

# Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fastmoving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised.

Why not consider *Genes* for your next genetics paper?

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:** JCR - Q2 (*Genetics & Heredity*) / CiteScore - Q2 (*Genetics*)
