Recent Advances in Pig Molecular Genetics and Breeding

Guest Editors:

Prof. Dr. Ruihua Huang

Dr. Pinghua Li

Dr. Liming Hou

Deadline for manuscript
submissions:

closed (15 September 2023)

Message from the Guest Editors

Animal husbandry is an important part of agriculture, and the pig industry is a huge industry.

This Special Issue will focus on recent research advances in pig molecular genetics and breeding. Research articles related to molecular genetic basis analysis for pigs' important economic traits (including, but not limited to, growth, reproduction, meat quality, stress resistance and disease resistance, etc.), the molecular regulatory mechanism regarding functional candidate genes or causative mutations, and the application of new breeding technologies in pigs are welcome.

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank: JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
