

Special Issue

Genetic Regulation and Molecular Phylogeny in Goat and Sheep Breeding

Message from the Guest Editor

This Special Issue is focused on the recent advances in goat and sheep molecular genetics and breeding. This includes analysis of the molecular regulatory mechanisms and molecular genetic basis for economically important traits (including but not limited to growth, reproduction, milk, wool, and disease resistance, etc.). Submissions describing genetic analysis of complex production traits using multiomics approaches (for GWAS, epigenomics, transcriptomics, proteomics, and metabolomics) to identify genetic mechanisms underlying important and complex traits are encouraged. With the help of your contribution, we hope to provide a better theoretical basis for the genetic breeding of goats and sheep.

Guest Editor

Prof. Dr. Linjie Wang

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
