

Special Issue

Post-transcriptional Regulation in Mammals

Message from the Guest Editors

This Special Issue is an opportunity for scientists to publish their original research on the post-transcriptional mechanisms regulating neuronal and glial cell metabolism, or to organize a review on specific aspects of this topic. Given the obvious connection with the mechanisms misregulating neuronal activity and leading to neurodegeneration, investigations aiming to comprehend the pathological aspects of the regulation are welcomed.

Guest Editors

Dr. Carlo Maria Di Liegro

Department of Biological, Chemical and Pharmaceutical Sciences and Technologies (STEBICEF), University of Palermo, 90100 Palermo, Italy

Dr. Gabriella Schiera

Department of Biomedicine, Neurosciences and Advanced Diagnostics (Bi.N.D.), University of Palermo, 90100 Palermo, Italy

Deadline for manuscript submissions

closed (30 April 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
