# Special Issue

# Application and Advances in Statistical Genetics

### Message from the Guest Editor

Statistical methods play a critical role in genetic studies, and advanced statistical methods and applications can enable researchers to expand upon existing results in the field. This Special Issue aims to highlight new statistical approaches or novel applications of existing statistical methods to studies related to genetics. We welcome original research and review papers demonstrating cutting-edge research on machine learning methods, causal inference, etc.

# About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

### Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

### Author Benefits

**Open Access:**
free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**
indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

**Journal Rank:**
JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
