

Special Issue

Genes and Pediatrics

Message from the Guest Editors

Pediatric diseases often have a strong genetic component, and integrating genetic analysis into clinical research can enhance our understanding of disease mechanisms, diagnosis, and management. This Special Issue, “Genes and Pediatrics”, brings together a collection of studies on a wide range of pediatric conditions, incorporating genetic findings to complement clinical observations. While the genetic variants reported may not be novel, their documentation in diverse pediatric diseases can contribute to broader datasets, aiding in diagnosis and patient care. By bridging pediatrics and genetics, this Special Issue aims to provide valuable insights for both clinicians and researchers working at the intersection of these fields.

Guest Editors

Dr. Giorgia Ceravolo

UCL Queen Square Institute of Neurology, University College London,
London WC1N 3BG, UK

Prof. Dr. Roberto Chimenz

Pediatric Nephrology with Dialysis Unit, Maternal-Infantile Department,
University Hospital of Messina, 98124 Messina, Italy

Deadline for manuscript submissions

10 December 2025

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
