

Special Issue

Genetics and Genomics of Bee

Message from the Guest Editors

The journal *Genes* is pleased to announce a Special Issue, titled “Genetics and Genomics of Bee”, which is seeking original research and review contributions. Bees are ubiquitously important pollinators. The development of genomic tools enables researchers to perform comprehensive explorations into the genetics and evolution of bees. In this Special Issue, we aim to report discoveries that develop our understanding of bees’ genetic diversity, genome and evolution, germplasm resources, epigenetics, phylogeny, and genetic breeding. Prof. Dr. Ting Ji

Guest Editors

Prof. Dr. Ting Ji
Dr. Zheguang Lin
Dr. Kang Wang

Deadline for manuscript submissions

closed (25 November 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
