

Special Issue

Molecular Genetics Research on Cellular Immunity

Message from the Guest Editor

Advances in genetic and genomic tools have contributed to fundamental breakthroughs in our understanding of diverse biological processes, with cellular immunology being no exception. In this Special Issue, we invite both fundamental and clinical researchers to report their findings on the molecular genetics of cellular immunity. Contributions are expected to highlight the impact of genetic diversity on cellular immune traits, explore the genetic factors related to particular pathogenic or protective cellular immune responses in patients with infections, autoimmune diseases or cancer, and characterize the functional effect of genetic variants in animal models and in in vitro cellular systems. The contribution of various types of research articles is encouraged, including original fundamental research, clinical genetic studies, interesting case reports, systematic reviews and meta-analyses.

Guest Editor

Dr. Zsolia Banlaki

Department of Medical Chemistry, Molecular Biology and Pathobiochemistry, Semmelweis University, Tűzoltó utca 37-47, 1094 Budapest, Hungary

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
