

## Special Issue

# Genome-Wide Identification: Recent Trends in Genomic Studies, Volume II

### Message from the Guest Editors

With the advances in high-throughput sequencing in recent years, rich sources of genotype and phenotype data have been produced, providing unprecedented opportunities for genome-wide identification of complex traits and disease-related biomarkers in humans, animals, and even plants and posing statistical and computational challenges to the paradigm of traditional GWAS. New methodological research continues to emerge at an impressive pace, breaking through the limitations of classical association mapping theory and expanding the scope of more sophisticated genomic applications. We invite you to contribute original articles, new methods, and thought-provoking reviews addressing recent trends in genome-wide identification to this Special Issue. If you would like more information about this Special Issue, or have any other questions, please feel free to contact us.

## About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

---

### Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan  
Department of Pathology, The University of Alabama at Birmingham,  
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
