

Special Issue

Canine Genomics and Disease Research

Message from the Guest Editor

Genes has a strong history of publishing the latest research in canine genetics. This Special Issue continues that legacy by highlighting the latest findings in canine genomics and disease. Submissions are invited to cover all relevant topics, including descriptions of genetic variation within and among canines, evolution and population genetics, new genomic resources, studies of gene function, and the results of disease and trait mapping studies. New findings and reviews relevant to this field are welcome.

Guest Editor

Prof. Dr. Jeffrey Kidd

Department of Human Genetics, University of Michigan, Ann Arbor, MI 48109, USA

Deadline for manuscript submissions

20 March 2026

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
