

Special Issue

Molecular Diagnostics for Cancer Treatment

Message from the Guest Editors

This Special Issue aims to highlight the developments made in methods capable of coping with the various needs of molecular diagnostics in routine care and their successful clinical application in cancer treatment. Any methods suitable to support molecular diagnostics in cancer (detection and treatment) are of interest. For clinical studies, it is important that the papers highlight the underlying molecular basis of the clinical findings. In addition to studies dealing with already approved methods, this Special Issue is open for the submission of papers dealing with methods on the edge of being included in clinical decision making, such as single cell sequencing, AI-based decision support systems dealing with sequencing results, etc. We solicit all types of papers with a clear focus on molecular diagnostics in the field of cancer treatment, including reviews, original articles, short communications, and case reports.

Guest Editors

Prof. Dr. Thomas Mairinger

Department of Tissue Diagnostics, Helios Klinikum Emil von Behring, 14165 Berlin, Germany

Dr. Fabian Dominik Mairinger

Institute of Pathology, University Hospital Essen, University of Duisburg-Essen, 45147 Essen, Germany

Deadline for manuscript submissions

closed (25 January 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
