Advances in Pharmacogenetics of Diseases

Message from the Guest Editor

Original research, reviews, and creative methods covering a variety of pharmacogenetics-related subjects in diseases are welcome in this Special Issue. The use of pharmacogenetics in clinical practice, the development of legislative tools and infrastructure related to pharmacogenetics, the search for novel pharmacogenetics markers specific to treatments of diseases, the importance of epigenetics and rare genetic variants in pharmacogenetics, and innovative protocols for pharmacogenetics research are just a few of the subjects covered in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
