

Special Issue

Plant Plastid Genome and Phylogenetics

Message from the Guest Editors

We are pleased to announce the upcoming Special Issue of the journal *Genes*, and cordially invite you to contribute your valuable research in this field. This Special Issue aims to explore and discuss the latest advancements and breakthroughs in plant plastid genome research, with a specific focus on phylogenetics. Plant plastid genomes play a crucial role in plant evolution, diversity and resource utilization. Exploring and understanding the plastid genome sequences provides valuable insights into plant phylogenetic relationships, population genetics and species conservation. We encourage the submission of original research articles, reviews, and perspectives that delve into the various aspects of plant plastid genome and phylogenetics. We are particularly interested in studies that provide novel insights, innovative methodologies and significant contributions to the field.

Guest Editors

Dr. Guiqi Bi

Dr. Min Cao

Dr. Luodong Huang

Deadline for manuscript submissions

closed (10 November 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
