

## Special Issue

# Molecular Genetics and Physiology of Crops

### Message from the Guest Editors

Crops have a complex genetic basis that makes it difficult to improve some important agronomic traits. Studies on the genetic diversity of crops are not comprehensive enough, and the genetic basis of important morphological physiological traits has not been systematically analyzed. It is necessary to explore the genetic variation of related traits at the physiological and molecular levels to discover and utilize key gene sources. This Special Issue "Molecular Genetics and Physiology of Crops" will be published in *Genes*. The collection will include research papers and review articles, reflecting the most recent progress and solutions to challenges in this dynamic research area.

## About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

---

### Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan  
Department of Pathology, The University of Alabama at Birmingham,  
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
