

Special Issue

Genomic Basis of Pediatric Kidney Diseases

Message from the Guest Editor

This Special Issue aims to showcase the significant impact of these genomic developments in pediatric nephrology. We invite submissions of original research articles, systematic reviews, and detailed case studies that investigate the application of genomic data in diagnosing, managing, and treating pediatric kidney diseases. We welcome contributions focused on a variety of topics, including, but not limited to, the development of new diagnostic protocols, genotype–phenotype correlations, innovative treatment approaches, and the use of multiomic analyses to chart disease progression.

Your contributions should aim to highlight the vital role that genomic research plays in enhancing clinical outcomes and patient care in pediatric nephrology. This Special Issue aims to be a pivotal

resource for clinicians and researchers committed to improving the health outcomes of children with kidney diseases.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
