Commemorating the Launch of the Section "Cytogenomics"

Message from the Guest Editor

A new section of *Genes* (ISSN 2073-4425, IF 4.096), "Cytogenomics", was launched in May 2021. This section aims to provide an international peer-reviewed medium for the dissemination and active discussion of the latest and most important advances in the field of genomics from a chromosomal perspective. We welcome the submission of high-quality research on various aspects of comparative genomics, nuclear organization, genome evolution and molecular cytogenetics. We have also established a new Special Issue to commemorate the launch of the section "Cytogenomics". The main focus of this Special Issue is review articles on "Chromosomics" where the status of chromosomal level genome assemblies and chromosome evolution is considered. High-quality research articles on any topic around this general area are welcomed. It is our pleasure to invite you to submit your exceptional manuscripts for publication in this Special Issue.

Guest Editor

Prof. Dr. Darren Griffin

School of Biosciences, University of Kent, Canterbury CT2 7NJ, UK

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
