

Special Issue

Feature Papers in the RNA Field

Message from the Guest Editors

The study of RNA is a scientific field that is constantly evolving, with new RNA molecules carrying new functions being discovered regularly. Indeed, a large proportion of non-coding DNA is converted into RNA molecules, which exert a huge variety of functions. The identification of their nucleotide sequences is rapid, but the determination of their secondary and tertiary structures, the characterization of their post-transcriptional modifications, and the identification of their precise functions remain difficult. Therefore, crucial research is currently being undertaken in this field, with important applications in human health, agriculture, agronomy and ecology. This Special Issue, entitled “Feature Papers in the RNA Field”, will gather high-quality reviews and cutting-edge research articles on various aspects of RNAs. It will comprise exclusive papers from the Editorial Board Members (EBMs) for the RNA Section, as well as invited papers from relevant experts.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-
2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
