

Special Issue

Genetics of Cardiovascular Metabolism

Message from the Guest Editor

This Special Issue is designed to present the latest research findings and developments in the field of cardiovascular metabolism. This includes all aspects of metabolic alterations during cardiovascular diseases and any other related pathologies with increased risk of CVD. The identification of metabolic changes related to CVD using multi-omics approaches (integrating genome, epigenome, transcriptome, proteome, and metabolome) is particularly encouraged, including methodological approaches such as Mendelian randomization and machine learning. Other studies showing the potential for use of population-based omics data as well as animal studies in deciphering cardiovascular disease genetics, mechanisms, and biomarkers are also welcome. In addition, studies providing evidence for the potential role of genes and metabolites in the incidence and progression of COVID-19 in subjects with cardiovascular comorbidities are encouraged.

Guest Editor

Dr. Mohsen Ghanbari

Department of Epidemiology, Erasmus MC-University Medical Center Rotterdam, P.O. Box 2040, 3000CA Rotterdam, The Netherlands

Deadline for manuscript submissions

closed (25 October 2023)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
