

## Special Issue

# Genetics and Genomics of Neurodegenerative Diseases

### Message from the Guest Editor

Genetic factors are essential to the pathogenic mechanism in neurodegenerative disease, as genetic causes or as modifiers of susceptibility to sporadic diseases. Recent research has been expanding our understanding of the genetics and genomics as a personalized medicine in neurodegenerative diseases such as Parkinson's disease, Huntington's disease, amyotrophic lateral sclerosis, as well as Alzheimer's disease or other neurodegenerative dementia. Articles submitted to this Special Issue should include basic and clinical studies, translational research, and clinical trials which should provide insights into the diagnosis, pathophysiology, and treatment of neurodegenerative diseases as mentioned above. We would like to invite you to submit your research work within the scope of the Special Issue, including not only bioinformatic gene analysis but also genetic and genomic changes following various treatments such as pharmacologic treatment, physical exercise, environmental enrichment, magnetic stimulation, electrical stimulation and so on for publication.

## About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

---

### Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan  
Department of Pathology, The University of Alabama at Birmingham,  
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
