

Special Issue

Genome Diversity of Adaptation and Speciation

Message from the Guest Editors

Uncovering the underlying mechanisms of adaptation and speciation is perhaps the most significant quest of evolutionary science ever since the introduction of the concept in the “Origin of Species.” As we entered the genomics era, the situation has changed drastically: every time genome data is released for a new species, or a new sequencing technology or analytic tool is introduced, the scope of opportunities expands for exploring inter- and intra-specific variation.

With a new arsenal of genomic data, bioinformatic and analytical tools, we are given an opportunity to answer pressing questions (i) on the predictions of evolutionary theory in the face of the environmental change, (ii) how mechanisms of adaptation and long-term survival are linked to the concepts of species diversity, genetic load, and extinction, and (iii) how evolutionary models can be refined to better represent the complexities of genome changes. We invite you to contribute to this Special Issue, which will showcase original contributions to the advancement in the genomic diversity of adaptation and speciation.

Guest Editors

Dr. Taras K Oleksyk
Oakland University, Rochester, MI, USA

Dr. Aleksey Komissarov
ITMO University, St. Petersburg, Russia

Dr. Fabia U. Battistuzzi
Department of Biological Sciences, Oakland University, 118 Library Dr.,
Rochester, MI 48309, USA

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
