

Special Issue

The Genomics of Glioblastoma

Message from the Guest Editors

Glioblastoma remains the most common primary malignant brain tumour in adults. Despite the combination of novel therapeutical approaches, it remains a deadly malignancy with an abysmal prognosis. This Special Issue in *Genes* on “The Genomics of Glioblastoma” will refine the understanding of tumour heterogeneity and microenvironment, providing new approaches to the diagnosis and treatment of glioblastoma. We especially welcome original translational research studies (in vivo, in vitro) highlighting new findings in the above areas, and short communications of preliminary but significant experimental results. In addition, experts in the field will review the current diagnostic, therapeutic and experimental models in glioblastoma. Finally, manuscripts that address the key challenges in paediatric glioblastoma will be of interest.

Guest Editors

Dr. Cristian Scatena

Dr. Francesco Pasqualetti

Dr. Luca Bertero

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
