

## Special Issue

# Genetic Insights into Plant-Pathogen Interactions

### Message from the Guest Editor

The Special issue “Genetic Insights into Plant-Pathogen Interactions” attempts to highlight the fascinating interactions that exist between pathogens and plants. The genetic factors influencing these interactions are examined in this issue, providing important information about pathogen evolution, plant defence mechanisms, and the general dynamics of these interactions. Researchers are invited to contribute their research that will expand our knowledge of the molecular and genetic underpinnings governing these important connections, opening new avenues for crop productivity and sustainable agriculture.

## About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
