

Special Issue

Clinical Genetics of Diabetes

Message from the Guest Editor

We are pleased to present this Special Issue of *Genes* dedicated to the “Clinical Genetics of Diabetes”, a rapidly evolving field at the intersection of genomics, endocrinology, and personalized medicine. Innovative techniques, including high-throughput sequencing, single-cell multi-omics, and machine-learning analytics, have uncovered novel mechanisms underlying β -cell dysfunction, insulin resistance, and immune dysregulation. These genomic insights enhance diagnostics, prognostics, and therapeutic strategies. This Special Issue of *Genes*, “Clinical Genetics of Diabetes”, captures this momentum and offers a platform for discoveries that will drive precision diabestology. We welcome original research, reviews, and perspectives that identify new disease genes, define genotype–phenotype correlations, refine diagnostic algorithms, test pharmacogenomic strategies, or examine ethical dimensions of genomic medicine.

Guest Editor

Prof. Dr. Tuncay Delibasi
Joslin Diabetes Center, SUNY Upstate Medical University, Syracuse,
NY, USA

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-
2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
