Gene Therapy for Childhood Diseases

Message from the Guest Editor

With new approaches to gene therapy for childhood diseases expanding at an astounding rate and making their way to clinics, including relatively new therapeutic modalities, such as gene editing, making their way to the clinics we want to highlight some of the original research going into translational programs for a variety of diseases that affect children worldwide. We realize that obtaining a gene therapy product approved for clinical use requires many steps from the bench to the bedside stage. We invite manuscripts that explore the transition of animal models through to clinical trials.

Guest Editor

Dr. Alisha M. Gruntman

Pediatrics, Horae Gene Therapy Center, University of Massachusetts Chan Medical School, Worcester, MA, USA

Deadline for manuscript submissions

closed (20 July 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
