

## Special Issue

# Genes of value: Individual genes that currently contribute, or might soon contribute, to sheep and goat production systems

### Message from the Guest Editors

In the context of the large body of literature now focused on finding important sheep and goat genes, and the various technologies being applied to selecting whole sheep and goat genomes for a given production system, the role that individual genes play can be overlooked. How then is our knowledge of individual sheep and goat genes and their effect being used currently, or how will it be used in the near future, to improve sheep and goat production. Is there a large disconnect between the science and technology and its practical applications in sheep and goat farming?

### Guest Editors

Prof. Dr. Jonathan Hickford

Department of Agricultural Sciences, Lincoln University, Lincoln 7647, New Zealand

Dr. Huitong Zhou

Gene-Marker Laboratory, Faculty of Agricultural and Life Sciences, Lincoln University, Lincoln 7647, New Zealand

## About the Journal

### Message from the Editor-in-Chief

*Genes* is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

#### Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
