

Special Issue

Toxicogenomics and Human Health

Message from the Guest Editors

This Special Issue on Toxicogenomics and Human Health is intended to cover the study of the adverse effects of environmental and pharmaceutical chemicals on human health and the environment by the use of genomic technologies, including genetic analysis, genome sequence analysis, gene expression regulation, proteomics, and metabolomics. Toxicogenomics relies on the use of genomic technologies to assess potential harmful effects to human health, integrating toxicant-specific alterations in gene, protein, and metabolite expression patterns with phenotypic responses of cells, tissues, and organisms. By relying on the study of disturbances of genetic mechanisms it can provide insight into subtle gene–environment interactions, leading to information that can assist in better discriminating sensitive data to evaluate toxic exposure, adverse outcome pathways (AOPs), or predict effects on human health.

Guest Editors

Prof. Dr. José Rueff

Centre for Toxicogenomics and Human Health, Genetics, Oncology and Human Toxicology, NOVA Medical School, Faculdade de Ciências Médicas, Universidade Nova de Lisboa, 1169-056 Lisboa, Portugal

Dr. António Sebastião Rodrigues

Centre for Toxicogenomics and Human Health, Genetics, Oncology and Human Toxicology, NOVA Medical School, Faculdade de Ciências Médicas, Universidade Nova de Lisboa, Lisbon, Portugal

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
