

Special Issue

The Molecular Biology of Viruses

Message from the Guest Editors

To observe and control viral expression and replication at a molecular level is important for understanding the control points, such as from gene knockdown and suppression. This Special Issue will focus on DNA and RNA viruses and how to regulate expression and interact with host organelle via processes such as mitochondrial-related cell death and autophagy flux. Moreover, research on novel antiviral compounds and drugs is also included.

Guest Editors

Prof. Dr. Jiann-Ruey Hong

Department of Biotechnology and Bioindustry Sciences, National Cheng Kung University, NCKU, Tainan, Taiwan

Prof. Dr. Jin-ching Lee

Department of Marine Biotechnology and Resources, National Sun Yat-sen University, Kaohsiung, Taiwan

Deadline for manuscript submissions

closed (25 September 2024)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
