

Special Issue

Feature Papers in "Neurogenetics and Neurogenomics": 2026

Message from the Guest Editors

We are pleased to announce the launch of a new Special Issue, "Feature Papers in "Neurogenetics and Neurogenomics": 2026". This issue is dedicated to curating and showcasing a select collection of high-quality research articles, reviews, and perspectives that represent significant advances and novel insights at the intersection of genomics and the nervous system. This edition aims to highlight cutting-edge discoveries in neurogenetics and neurogenomics, with a focus on the genetic and genomic underpinnings of nervous system development, function, and disease. We invite contributions that address mechanistic insights, innovative methodologies, and translational applications in the diagnosis, treatment, and prognosis of neurological disorders. We strongly encourage leading researchers in the field, as well as *Genes* Editorial Board Members of the 'Neurogenomics' section, to contribute manuscripts from their research group that reflect the forefront of their expertise. Through this issue, we seek to reinforce the section's role as a leading open-access platform for rigorous and influential research in neurogenomics.

Guest Editors

Dr. Claudia Ricci

Department of Medical, Surgical and Neurological Sciences, University of Siena, 53100 Siena, Italy

Prof. Dr. Micheal Palladino

Department of Pharmacology & Chemical Biology, University of Pittsburgh, Pittsburgh, PA 15260, USA

Deadline for manuscript submissions

25 December 2026

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-
2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
