

Special Issue

Genetics in Wildlife and Fisheries Conservation and Management

Message from the Guest Editors

The aim of this Special Issue is to better understand how population genetics can inform wildlife conservation and management. Relevant studies could occur through many avenues, including (but not limited to) landscape-scale characterization of genetic variability and differentiation, characterization of the patterns of rapid evolution, identification of candidate adaptive genes, as well as the examination of the complex interplay between various conservation concerns, including inbreeding, transposable elements, and adaptation. Submissions using any genetic or genomic approach or simulations of such data using wildlife populations as model organisms to understand conservation and management are encouraged.

Guest Editors

Dr. Janna Willoughby

School of Forestry and Wildlife Sciences, Auburn University, Auburn, AL 36849, USA

Dr. Elizabeth Kierepka

North Carolina Museum of Natural Sciences, North Carolina State University, Raleigh, NC 27601, USA

Deadline for manuscript submissions

closed (20 April 2022)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Experimental Cancer Therapeutics, The University of Alabama at
Birmingham, 1825 University Blvd., SHEL 814, Birmingham, AL 35294-
2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
