Zoonotic Pathogen Infection and Host Defenses

Message from the Guest Editor

Zoonotic pathogens live naturally in animals and can infect human cells, perhaps mutating slightly in the course of passage, which enables the pathogen to start a chain of infection through human hosts. Currently, there are many zoonotic pathogens that can infect humans and cause serious effects on human health. Thus, it is important to understand the interactions between zoonotic pathogens and hosts, which will lay a foundation for the prevention and control of zoonotic diseases. In this Special Issue, we welcome reviews and original articles covering many aspects of the interactions between zoonotic pathogens and hosts. These include but are not limited to wild type pathogen isolation and evolutionary analysis, host defense mechanisms following zoonotic pathogen infection, roles of the microbiome during zoonotic pathogen infection, gene therapy for zoonosis, and vaccine development for zoonosis. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
