

Special Issue

DNA Replication Controls

Message from the Guest Editor

In this Special Issue, we welcome reviews, new methods, and original articles covering many aspects of DNA replication controls. These include, but not limited to, regulation of the replisome and its components, DNA replication checkpoints, S-phase stress responses, replication of difficult-to-replication sites, replication of specific genomic loci (such as telomeres and rDNA), translesion synthesis, DNA repair during DNA replication, and other cellular processes that are coordinated with DNA replication. We look forward to your contributions.

Guest Editor

Dr. Eishi Noguchi

Department of Biochemistry and Molecular Biology, Drexel University
College of Medicine, Philadelphia, PA 19102, USA

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
