Genetics and Biomarkers of Neurodegeneration

Message from the Guest Editor

Neurodegenerative diseases (NDs) are major public health burdens across the globe. Neurodegenerative diseases mainly consist of Alzheimer's disease (AD), Parkinson's disease (PD), amyotrophic lateral sclerosis (ALS), and a few other devastating diseases. Genetics certainly plays an important role in the pathogenesis of ND. However, other factors such as infection, immune dysregulation, and vascular dysfunction may also be crucial to disease development. Neurodegeneration is irreversible once clinical symptoms are overt. Therefore, early detection and intervention are critical. This Special Issue, The Genetics and Biomarkers of Neurodegeneration, is intended to provide a platform for a wide range of reviews, research articles, communications, and technical notes related to the genetics or biomarkers of the major NDs. We encourage manuscripts to have a strong precision medicine component that may include, but is not limited to: genetics of NDs in diverse populations, genetic risk scores, CSF biomarkers, neuroimaging markers, and personalized intervention strategies. Please contact the with questions related to the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
