

Special Issue

Genetics of Halophilic Microorganisms

Message from the Guest Editors

Halophilic microorganisms can be found in all domains of life and can thrive in environments with high salt content. They have been a subject of study for many years due to their interesting properties and physiology. An understanding of the genetics of halophilic microorganisms (from gene expression and regulation to genomics) will help to better understand the mechanisms of how life can occur at high salinity levels. This Special Issue is dedicated to the Genetics of Halophilic Microorganisms and their viruses. Colleagues are cordially invited to contribute original research papers or reviews to this Special Issue.

Guest Editors

Prof. Dr. Rafael Montalvo-Rodríguez

Department of Biology, University of Puerto Rico, Box 9000, Mayagüez, PR 00681, USA

Prof. Dr. Julie A. Maupin-Furlow

Department of Microbiology and Cell Science, Institute of Food and Agricultural Sciences, University of Florida, Gainesville, FL 32611, USA

Deadline for manuscript submissions

closed (28 February 2019)

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
