

Special Issue

Mendelian Randomization Studies in Cardiometabolic Diseases

Message from the Guest Editors

The focus of the themed issue is the application of Mendelian randomization' in cardiometabolic disease and articles may span Mendelian randomization' studies of cardiometabolic phenotypes, methodological papers and reviews. In this issue, we invite articles that highlight how developments in the field have allowed for genetic association data to be leveraged for identifying causal mechanisms in cardiometabolic disease subtypes, including mediating pathways. We welcome articles that showcase insights on drug target development, including the investigation of efficacy in population subgroups, repurposing potential and adverse effects.

Guest Editors

Prof. Dr. Andrzej Ciechanowicz

Prof. Dr. Sandosh Padmanabhan

Prof. Dr. Marek Sanak

Dr. Dipender Gill

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
