

Special Issue

Molecular Pathology, Genetics and Genomics in Surgical Pathology

Message from the Guest Editor

The importance and use of molecular pathology, genetics and genomics in surgical pathology have expanded greatly over the past few years and have led to the identification of new genetic alterations and therefore to a better understanding of the tumorigenesis, detection and classification of solid tumors. Moreover, molecular pathology also plays an important role in the prognosis and identification of targets that can be used for targeted therapy in solid tumors. In this Special Issue, we welcome reviews, original articles, and short reports that cover different diagnostic, therapeutic predictive and/or prognostic aspects of molecular pathology, genetics and genomics in surgical pathology.

About the Journal

Message from the Editor-in-Chief

Genes is central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the *Genes* team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider *Genes* for your next genetics paper?

Editor-in-Chief

Prof. Dr. Selvarangan Ponnazhagan
Department of Pathology, The University of Alabama at Birmingham,
1825 University Blvd, SHEL 814, Birmingham, AL 35294-2182, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Genetics and Heredity) / CiteScore - Q2 (Genetics (clinical))
